Objective:

I'm a software engineer specializing in full-stack web development using .NET technologies. I build and maintain scalable, data-driven applications with a strong focus on clean architecture and efficient back-end solutions in C# and .NET Core. On the front end, I deliver responsive, user-friendly interfaces using HTML5, JavaScript, and CSS3, ensuring a complete end-to-end development capability.

I work efficiently with modern frameworks like .NET Core Web API and MVC, applying agile methods to keep projects on track and clients engaged at every stage. My experience also includes SQL Server programming, Git/GitHub collaboration, unit testing, and Docker containerization, all of which strengthen my ability to deliver reliable, production-ready applications.

Education:

Computers and Artificial Intelligence Fayoum University, June 2027

Experience:

Software Development - Full stack .Net Web Developer (DEPI) - June 2026

- Prompt Engineering
- Introduction to SQL Server Programming
- Getting Started with Git and GitHub
- Programming in C#
- Programming in HTML5, JavaScript & CSS3
- Functional Documentation & Unit Testing
- Containerization basics using Docker
- .Net Core Web API
- Developing .NET Core MVC Web Applications
- Capstone Project

Courses:

2025	UX Design Fundamentals
2025	Introduction to cybersecurity course
2024	Mastering Object-Oriented Programming (OOP) using C++

Certificates:

(29 August 2025) UX Design Fundamentals, [ITI Mahara-Tech](#).

(30 July 2025) Introduction to cybersecurity course, [Cisco](#).

(18 December 2024) Mastering Object-Oriented Programming (OOP) using C++, [ITI Mahara-Tech](#).

Technical skills:

- **Backend Development (.NET Framework)**
- C++ Programming
- Object-Oriented Programming (OOP)
- Problem Solving & Algorithms
- Data Structures
- Git & Version Control
- Agile Methodologies

Languages:

- Arabic (**Native**)
- English (**Professional Working Proficiency**)
